Guatemala City Small and Medium Wind Power Generation System

Overview

How much wind power does Guatemala have?

Guatemala's Ministry of Energy and Mines (MEM) used to estimate wind energy potential in the country as high as 7000MW, while much more conservative opinions consider the economically viable wind potential in the country is somewhere between 400-700MW .

What is San Antonio El Sitio wind power project?

San Antonio El Sitio Wind Power Project is the first wind project located in the Guatemalan region. This project was executed by a Guatemalan firm, Eólico San Antonio El Sitio, and deploys sixteen 3.45 MW units of wind Turbine Generators for an annual average of 135.655 GWh of green electricity to the regional grid.

What is a wind power project?

The wind project will generate electricity from a clean, inexpensive source of energy that is renewable. The wind power project consists of installing sixteen wind turbine generators for a total capacity of over 55 MW. The site is expected to provide 135,000+ GWh per year to the Guatemalan National Interconnected System.
