Helsinki outdoor energy storage vehicle

Overview

Can battery storage support Finland's power grid?

One of the world's northernmost battery storage systems is now supporting Finland's power grid as part of a joint venture between Sungrow and FRV AmpTank. In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid.

Why is Finland a leader in energy and storage solutions?

Finland has become a leader in innovative energy and storage solutions. The strong focus on research, supportive policy environment, well-functioning collaboration ecosystem and Finnish technological expertise are some of the reasons behind Finland's success.

How many electric car batteries can a Vantaa energy storage facility charge?

Vantaa Energy is building a seasonal thermal energy storage facility in Vantaa, Finland. When completed in 2028, it will be the largest in the world by all standards and its thermal energy capacity could fully charge as many as 1.3 million electric car batteries. The fluctuating nature of renewable energy is one of its main issues.

Where is Finland's new battery storage facility located?

In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid. The plant, equipped with 26 PowerTitan 1.0 containers from Sungrow, delivers 30 MW of output and 60 MWh of storage capacity.
