# How big a battery should a 200 watt solar panel be equipped with

## Overview

---

Does a 200W solar panel need a battery?

A 200W solar panel offers various power applications from small fridges to laptops and smaller devices. But, to take advantage of the power this panel can generate in a day, you should have a battery attached. You can use a single 100ah lithium-ion battery or two 100ah lead-acid batteries wired in parallel with a 200W solar panel.

How much would 200W solar panels & batteries cost?

For a fixed panel, you would be looking at around \$230, while the portable ones would cost about \$430, while a sealed lead-acid battery would be around \$130, with a lithium-ion battery priced at around \$200. As demand for lithium-ion batteries grows, they are becoming cheaper.

What size battery do I need for a solar panel?

What size battery you need, will depend on the total power production of your solar panels. And the power output of the solar panels will depend on how many peak sun hours your location receives. Which I'll explain in a moment. Generally, for a 200 watt solar panel, you need 12v 100Ah lithium or 12v 200Ah lead-acid battery.

Can a 200 watt solar panel charge a 12 volt battery?

A 200W solar panel will fully charge a 12v 100Ah battery from 100% depth of discharge in about 7.5 peak sun hours. How fast will a 200-watt solar panel charge a 12-volt battery?

A 200-watt solar panel will take anywhere between 5-15 peak sun hours to charge fully charge a 12v battery. The difference will depend on the size and type of battery.

## How big a battery should a 200 watt solar panel be equipped with

### [What Size Battery for 200W Solar Panel: A Complete Guide ...](#)

To determine the ideal battery size for a 200W solar panel, calculate your daily energy consumption in watt-hours and multiply it by the desired number of backup days.
