How long is the general warranty period for 5G base station lithium batteries

Overview

How long does a lithium battery warranty last?

The warranty start date of lithium batteries cannot be later than six months (outside China) or three months (in China) after the battery delivery date.

Scenario 1: Party B is responsible for product installation.

How long does a lithium battery last?

The standard warranty period of lithium batteries is one year. If extended warranty is required, consult the SSD and evaluate the maximum service life of lithium batteries based on the battery model and application environment. Extended warranty can be provided within the service life and needs to be quoted.

What is the warranty period for the battery pack?

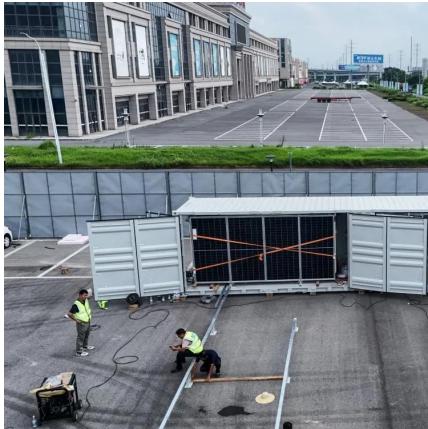

The warranty for the UH9050's battery pack is 5 years. The warranty for the accessories is 1 year. This warranty is only valid in the original country of purchase for a Product first purchased either in Australia or New Zealand. If a warranty claim is made, this warranty will not apply if the Product is found by Uniden to be damaged or not in compliance with the user manual.

What happens if a lithium battery fails during the warranty period?

Faulty parts replacement: During the warranty period, if an individual failure is caused by the lithium battery quality problem of Party B, Party B is responsible for delivering qualified parts to the receiving place agreed by both parties within the committed service level agreement (SLA).
