

# **How many hydrogen energy stations are there in Mexico**

## Overview

---

How many hydrogen stations will Mexico have in 2025?

According to the International Renewable Energy Agency (IRENA), Mexico has ambitious plans to increase the number of hydrogen stations and electric charging points. It is anticipated that there will be at least 25 operational hydrogen stations and more than 1,000 electric charging points available by the end of 2025.

Can Mexico develop a hydrogen market?

Thanks to its well-established fossil fuels industry and burgeoning renewable energy operations, Mexico has the potential to use its energy expertise and infrastructure to vastly develop its hydrogen market over the coming decades.

Which cities have hydrogen stations in Mexico?

Here's a look at the top cities and areas with hydrogen stations in Mexico:

**Mexico City:** Several hydrogen stations and numerous electric charging points are spread throughout the city, with concentrations in areas such as Polanco, Santa Fe, and the Historic Center.

Which companies make hydrogen in Mexico?

Air Liquide, Linde, and Cryo-Infra/Air Products also have hydrogen operations in Mexico. As the country develops its green energy market, it could rapidly expand its hydrogen production to meet the needs of a growing global market.
