

# How many solar container battery factories are there in Northern Europe

## Overview

---

How many battery factories are there in Europe?

This, coupled with the ongoing competition with China, is why it is anticipated that around 250 battery factories will be established in Europe over the next ten years. By the end of last year, approximately 20 projects had been confirmed in European states such as France, Germany, Italy, and the United Kingdom.

What is happening in the European battery industry?

The European battery industry has witnessed significant growth in recent years, with major European battery manufacturers like LG Chem, Continental AG, and Exide Technologies investing heavily in new battery factory projects.

What is the EU solar manufacturing map?

The EU Solar Manufacturing map gives an overview of solar manufacturing companies active along the solar PV chain. On this map, you'll find manufacturers spanning from polysilicon to module as well as the aggregate production capacities for each segment.

Which countries are investing in battery factories in 2024?

Investments in battery factories in Europe have seen significant growth in 2024, focusing on expanding lithium battery production capacity. European countries like France, Germany, Italy, Spain, Norway, Poland, Portugal, Serbia, Slovakia, Britain, and Czechia are actively involved in establishing new battery factories.
