

# How many solar energy storage companies are there in the Dominican Republic

## Overview

---

Does the Dominican Republic have solar power?

In addition to these grid-tied projects, the Dominican Republic has several distributed solar projects to provide power in off-grid locations. The Dominican Republic has high wind potential and already boasts several utility-scale wind projects.

Is solar energy a viable resource for the Dominican Republic?

High solar potential, along with integrating efficiencies and economies of scale, can make solar energy a viable resource for the Dominican Republic. Similarly, wind energy has strong potential, particularly in the southwest.

What is the current condition of the Dominican energy sector?

The PEN presents the current condition of the Dominican energy sector while outlining its future development. The DR's installed generation capacity connected to the National Interconnected Electric System (Sistema Eléctrico Nacional Interconectado - SENI) is around 5,631.47 MW and the average peak demand is around 3,312 MW.

Is the electric power sector affecting the Dominican economy?

Despite the present administration's efforts to increase the installed capacity of electricity generation from renewable sources, the electric power sector continues to be one of the most significant problems affecting the Dominican economy.

## How many solar energy storage companies are there in the Dominican

### [Solar Energy Startups in Dominican Republic](#)

Solar Energy Sector in Dominican Republic has a total of 16 companies which include top companies like RENSA SRL, KAYA Energy Group and CSS.
