

How much does New Zealand s energy storage solar cost

Overview

How much does a solar battery cost in New Zealand?

The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget. The best value was \$9,000 for a 9.6 kWh battery, equating to \$937.50 per kWh. Indicating the batteries below \$1000/kWh can be hunted down in the NZ market. What's Next for Solar Prices in 2025?

.

How much does a 5kw Solar System cost in New Zealand?

The average cost to install a 5kW system in New Zealand is now around \$11,000–\$13,000, compared to \$15,000+ just a few years ago. With systems lasting 25+ years and minimal maintenance required, the upfront investment quickly pays for itself. Rising energy prices + falling solar costs = faster return on investment for NZ households and businesses.

How much does a solar power system cost?

Average Price For A Solar Power System: The typical solar power system size from our dataset was a 7kW, the average cost for this system size was \$16,492. **Battery Systems Prices:** The average battery cost is \$1,249.79 per kWh, with smaller systems offering affordability and larger systems offering better value per kWh.

Why are solar prices so high in New Zealand?

This stems from differences in retail prices and the solar resource between cities. Prices are highest in Queenstown, followed by Auckland, Christchurch, and Wellington, while the solar resource is best in Queenstown, followed, as with prices, by Auckland, Christchurch, and Wellington.
