# How much does a 100kW solar-powered container farm cost in Africa

## Overview

---

How much does a 100kW Solar System cost?

Because different area, the electricity bill is different. The 100kw grid tie solar system cost is \$30,468 (2024.4.9 price), and the electricity bill is \$0.23/kwh. And this is not included the installation cost and the shipping fee. So the system can be paid back in 2 years roughly.

How much does a 1 MW solar farm cost?

At \$0.98 per watt, a 1 MW solar farm will cost roughly \$980,000, not including land acquisition costs. Solar farms are large ground-mounted solar installations that occupy vast areas of open land and provide clean energy generated by the sun. By large, we mean solar installations with megawatts of capacity.

What is a solar farm?

Solar farms are large ground-mounted solar installations that occupy vast areas of open land and provide clean energy generated by the sun. By large, we mean solar installations with megawatts of capacity. To put that into perspective, a one-megawatt solar farm is the equivalent of about 166 home solar systems!.

Why are solar farms so expensive?

Energy production can be inconsistent due to the sun's intensity varying with location, time of year, and time of day. High upfront cost: Although utility-scale solar has a lower cost per watt than residential solar, the sheer size makes a solar farm such a significant investment, reaching millions of dollars to build.
