

# How much does a square meter of solar panels cost

## Overview

---

How much does a solar panel cost per square meter?

These incentives effectively lower the price per square meter of a solar panel system, making it more affordable for individuals and businesses. The price per square meter of a solar panel can vary depending on several factors. Generally, residential solar panel systems cost around \$1,500 to \$3,000 per square meter.

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How much does a 30m<sup>2</sup> solar PV system cost?

A residential property in an urban region of South Africa installs a 30m<sup>2</sup> solar PV system featuring mid-range monocrystalline panels. The solar panel cost per square meter, including all labor and system components, is approximately \$6,000.

How much does solar cost in California?

Divide annual kWh by ~1,200 (typical kWh/year per kW of solar in much of California). In California, expect \$2.75 – \$3.50 per watt before incentives (solar panel cost in California). This gives your solar cost per square foot. Estimate your system size, price before and after incentives, and cost per square foot.
