

# How much does an uninterruptible power supply cost in Palestine

## Overview

---

How is the electricity system in Palestine different from other countries?

And upgrade of the electricity grid to enable distribution of renewable energy, by 2030 . The electrical energy system in Palestine state is different from any other country, because Palestine imports its energy from three different sources; from Israel (85 %), Jordan (2 %) and Egypt (3 %).

Can wind energy be used to generate electricity in Palestine?

When Hasan first looked into the possibility of using wind energy to generate electricity in Palestine in 1991, he came to the conclusion that areas with an elevation of 850 meters or more, including Ramallah and Jerusalem, have excellent energy potential . In some areas of the WB, wind energy may be produced at 0.07 \$/kWh .

How much does it cost to build a power plant in Palestine?

The Palestine Power Generation Company continues to plan for the establishment of a combined-cycle power plant with a total capacity of up to 450MW each on a Build Own and Operate (BOO) basis. Implementation of the 250MW first phase will involve a pilot project at a total cost of \$344 million in the North of the West Bank.

What is Palestine's energy strategy?

Palestine's approach is to priorities high-emitting sectors such as, power generation (62 %), transport (15 %), and waste (23 %). The National Adaptation Plan is as: increase the share of renewable energy in electrical energy mix by 20-33 % by 2040, primarily from solar PV. Improve energy efficiency by 20 % across all sectors by 2030.
