# Huawei Apia Mobile Energy Storage Project

## Overview

---

Will Huawei fusion solar power Red Sea city's off-grid energy needs?

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. The Red Sea Project, a key part of SaudiVision2030, is now the world's largest microgrid with 1.3GWh storage capacity.

What is Huawei fusionsolar smart string ESS?

Subscribe to The Week in Huawei. As a cornerstone of SaudiVision2030, the Red Sea Project now stands as the world's largest microgrid energy storage project, with a storage capacity of 1.3GWh. Utilizing Huawei FusionSolar Smart String ESS solution, this groundbreaking project is redefining renewable energy infrastructure.

Why is Huawei involved in the Red Sea project?

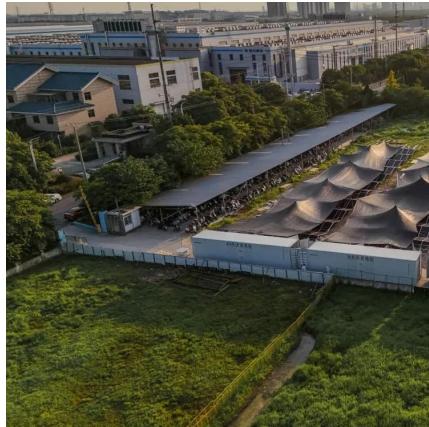

Huawei's involvement in the Red Sea Project underscores its commitment to sustainability, technological expertise, and collaboration. "The Red Sea Project provides an unparalleled opportunity to demonstrate this commitment and showcase our industry-leading innovation and technology," said Xing. "It's a blueprint for sustainable cities."

What is Huawei doing in Asia-Pacific?

Meanwhile, in Thailand, Huawei built Asia-Pacific's largest single-site C&I PV and ESS plant at Mahidol University, including a 12 MW PV system and a 600 kWh ESS. "Huawei's smart string and grid-forming ESS solution significantly improves a power grid's ability to integrate renewable energy," Xing explained.

## Huawei Apia Mobile Energy Storage Project

### [What is Huawei doing with energy storage?](#)

In summary, Huawei's strategic priorities in energy storage are multi-faceted and aim to reshape not only the company itself but also the broader energy landscape. Focused on advanced technology ...
