Huawei South Sudan Energy Storage Project

Overview

Will Huawei build new solar power stations in Sudan?

“The Huawei delegation revealed the company’s intention to implement a huge project to build new solar power stations. to enhance Sudan’s renewable energy sources,” the statement said. Sudan’s power infrastructure has been severely damaged during the ongoing conflict.

Does South Sudan have a large-scale solar power project?

South Sudan has taken a significant step toward renewable energy with the launch of its first large-scale solar power project. The Ezra Group, a prominent business conglomerate, has successfully developed and financed a 20-megawatt (MW) solar power plant, complemented by a 14-megawatt-hour (MWh) Battery Energy Storage System (BESS).

Why should South Sudan invest in solar power & battery storage?

This project marks a significant achievement for South Sudan, reinforcing its commitment to renewable energy and environmental responsibility. By investing in solar power and battery storage technology, the country is making a decisive move toward energy independence, economic growth, and a sustainable future for its people.

Will China build a solar power station in Sudan?

July 2, 2025 (PORT SUDAN) – China’s Huawei has proposed building solar power stations in Sudan with a capacity of over 1,000 megawatts (MW), the country’s energy ministry announced on Wednesday, as the conflict-hit nation struggles with extensive damage to its power grid.
