Huawei Vientiane Energy Storage Charging Pile

Overview

How many Huawei Supercharge charging piles will be installed in China?

(Yicai) Dec. 8 -- Huawei Technologies will join hands with its clients and business partners to install over 100,000 Huawei SuperCharge charging piles along major roads in China next year. The project will touch more than 340 Chinese cities, Hou Jinlong, president of Huawei Digital Power Technology, said during an industry forum yesterday.

Why are Chinese charging pile companies so popular?

Chinese charging pile companies have advantages in the supply chain, technology innovation and cost, leading to high demand in overseas markets, industry experts said. With emissions regulations tightening, the transition to vehicle electrification is unstoppable worldwide.

How much does a charging pile cost in China?

Overseas charging piles of the same power are priced several times higher than those in China. For instance, a 120 kilowatts DC charging pile overseas costs around 464,000 yuan (\$64,000), significantly more than the 30,000 to 50,000 yuan price range in China, according to a report of Industrial Securities.

What is Huawei Supercharge?

Founded in 2021, the unit of the Shenzhen-based telecoms giant focuses on clean energy generation, data centers, and electric mobility. Huawei launched the SuperCharge platform this year to enable a range of more than 200 kilometers after just five minutes of charging.
