

# Ibm uninterruptible power supply

## Overview

---

What is IBM uninterruptible power supply (UPS)?

Enterprise-level power protection and features are now available for the desktide user with the introduction of the IBM line of uninterruptible power supply (UPS) offerings designed for tower servers and high-end workstations.

What is an industrial uninterruptible power supply system?

Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment. Our systems offer applications ranging from a few hundred watts to massive Multi-Mega Watt Parallel UPS installs inclusive of voltage regulations, voltage correction, sag correction, surge suppression and harmonic mitigation.

What are IBM UPS & why should you buy them?

Designed by IBM to meet customer requirements for high availability and cost-effective power management, these IBM UPS products deliver more features and better performance at a lower price per watt than previous UPS models offered by IBM.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS), calculate the average power required for all connected appliances. For instance, a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.
