

# **Indian lead-acid battery energy storage container quotation**

## Overview

---

How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

What is the share of hybrid energy tender capacity in India?

With a rise in preference for firm renewable energy, the share of hybrid tendered capacity has increased from about 12% in 2021 to over 49% in 2024 in the overall renewable energy tenders. Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications.

Are battery supply chains causing project execution risks?

In addition, uncertainties in battery supply chains are increasing project execution risks. While India continues to keep the import duty on batteries and their components high to encourage domestic manufacturing, local manufacturing is yet to scale.

## Indian lead-acid battery energy storage container quotation
