

Inside the container generator set

Overview

What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments – validated at ambient temperatures of up to 55 degrees Celsius.

What is a container-type diesel generator set?

The outer shape of the container-type diesel generator set is the standard size of the container, and there is no need to order a special container space during sea transportation, which greatly saves transportation costs. 3.

What is a sollant container diesel generator set?

The SOLLANT container diesel generator set has a compact and beautiful appearance through careful design. The box body adopts a detachable structure and is made of steel plates. The surface is sprayed with high-performance anti-corrosion and anti-rust paint.

How should a containerized diesel generator be arranged?

Typically, special attention is paid to the intake and exhaust ports of the containerized diesel generator set to ensure smooth air flow. The intake should be positioned away from dusty or sand-prone areas, and the exhaust port should be properly arranged to expel hot air effectively while minimizing environmental impact.
