# Installing solar panels in Kathmandu

## Overview

---

How many solar panels are installed in Nepal?

As of 2011, there were 206152 numbers of solar home systems with a total installed capacity of 5.6 MW, 155574 numbers with a small solar home system capacity of 0.737 MW, and 415 numbers of institutional solar PV with a capacity of 0.53 MW.

Can a microgrid Solar System be installed in Nepal?

Last month, I had the privilege of helping to install a small, off-grid solar system in Nepal. The microgrid installation was located a day's drive into the Himalayas outside of Kathmandu. As we drove to the site location, I saw less and fewer lights until I saw the literal end of the electrical grid. and then we kept driving into the mountains.

How will electricity affect Nepal's future?

There was also a Nepalese crew with us consisting of translators, cooks, solar experts, and a small film crew. The film crew was there to document the changing cultural narrative of the village, and the impact electricity might have on its future. Something like electricity can bring commerce, healthcare, and stability to the growing village.
