

# **Integrated inverter 16 times the power**

## Overview

---

What is a sunsynk Max 16kw inverter?

The Sunsynk MAX 16kW is a low voltage (48V) hybrid inverter suitable for off-grid, grid support, back-up and self-consumption PV systems. Moreover, the inverter can also be used in both three-phase and single phase parallel applications. The largest single-phase hybrid Inverter on the market.

How many X inverters can be connected?

A total of 15 x inverters can be connected in a three-phase configuration (five units per phase) - giving a maximum power output of 240kW. 3 x inverters can be connected in a single-phase configuration giving a total power of 48kW. Contains 3 x MPPTs to allow for flexible PV array designs and improved efficiency.

Can a single phase hybrid inverter be used in parallel applications?

Moreover, the inverter can also be used in both three-phase and single phase parallel applications. The largest single-phase hybrid Inverter on the market. A total of 15 x inverters can be connected in a three-phase configuration (five units per phase) - giving a maximum power output of 240kW.

Why should you choose a switch 31-level inverter?

With an efficiency of 96%, it excels in tracking MPP even under challenging conditions. Moreover, the reduced switch 31-level inverter design contributes to lowering the THD to 2.16%, well within IEEE standards, thereby improving power quality and reducing electromagnetic interference.
