

Inverter 110kw installation

Overview

How to install an inverter?

Step 1: Take out the inverter from the packing carton. Step 2: Hoist the inverter to the installation position. Step 3: Hang the inverter to the mounting-bracket and ensure that the mounting ears perfectly engage with the mounting-bracket. Step 4: Fix the inverter with screws M6x30.

What are the safety instructions for an inverter?

5.1 Safety Instructions Prior to any electrical connections, keep in mind that the inverter has dual power supplies. It is mandatory for the qualified personnel to wear personal protective equipments (PPE) during the electrical work. Danger to life due to a high voltage inside the inverter!.

What is s5-gc (100-110k) series inverter?

S5-GC (100-110)K series inverters can be widely used in C&I and utility PV projects with compatibility, efficiency, and high energy density, with 90MPPT/MW tracking density, max 98.7% conversion efficiency and 16A current per string, can perfectly match various high-efficiency modules and bi-facial modules, brings more benefits.

How do I move the inverter?

wrench ≥ 1100 Vdc 4-6mm² Vacuum cleaner
4.4 Moving the Inverter Before installation, remove the inverter from the packing case and move it to the installation site. Follow the instructions below as you move the inverter: Always be aware of the weight of the inverter. Lift the
