

Large solar container system price in Ho Chi Minh Vietnam

Overview

How much will a solar PV project cost in Vietnam?

Central to the growth of the solar PV industry in Vietnam was the announcement in 2017 that projects commissioned before the end of June 2019 would qualify for a 20-year FIT contract of US\$0.0935/kilowatt hour (kWh), leading to a rush to get projects off the ground.

How much solar power does Vietnam have?

Industry overview According to the International Renewable Energy Agency (IRENA), the installed solar power capacity, which is the maximum capacity that a solar system is designed to run at in Vietnam, accounts for more than a third of Vietnam's total renewable energy capacity at 18,854 GW in 2023.

Why should foreign investors invest in solar energy in Vietnam?

Vietnam's solar energy market, driven by high solar potential and strong government support, plays a key role in the country's "Net Zero" commitment, among other fields of green energy. For foreign investors, this presents a golden opportunity to tap into a rapidly growing sector with sustainable impacts.

How many rooftop solar projects are there in Vietnam?

Vietnam currently has approximately 103,000 rooftop solar power projects across residential, commercial, and industrial buildings, boasting a total installed capacity of over 9,500 MW. By 2030, Vietnam aims to significantly increase its solar capacity, projecting that 50 percent of households will have rooftop solar installations.
