

Lg21700 battery cell parameters

Overview

What are the characteristics of LG Energy Solution inr21700-m50lt?

The graphs show a selection of characteristic data of the cell LG Energy Solution INR21700-M50LT to evaluate the cell performance. Discharge Characteristics: The electrical and thermal discharge behavior is strongly nonlinear. Pulse Characteristics: The shape of different current pulses changes strongly.

Is the LG inr21700 M50 safe?

Independent safety tests of the cell. The LG INR21700 M50 is a high energy and moderate power cell. Based on it's capability it has been used in a lot of applications and for a lot of research programmes. Note: if you have tested this cell independently and able to share data please contact us nigel@batterydesign.net.

What is the discharge temperature of LG m50l 5000 mAh 21700 cells?

LG M50L Max. Discharge Current Use Temperature Range (°C): Environmental 0 to 45 for charge, -30 to 55 for discharge / Surface limitation 55 for charge, 70 for discharge. >200K of LG M50L 5000mAh 21700 cells in stock, fast shipping by air or sea with MSDS UN38.3 SGS CB BIS UL IEC62133 UL1642 and Test Report.

How much does a 21700 battery weigh?

Tip: When selecting a 21700 battery, consider the specific chemistry to match your application's energy and cycle life requirements. The 21700 cell weighs approximately 60–70 grams, depending on the manufacturer and specific chemistry.
