

Lithium Electrochemical Energy Storage Power Station

Lithium Electrochemical Energy Storage Power Station

This is why batteries are important for the energy transition

The main difference is the energy density. You can put more energy into a lithium-Ion battery than lead acid batteries, and they last much longer. That's why lithium-Ion batteries ...

[How innovation will jumpstart lithium battery recycling](#)

Too many lithium-ion batteries are not recycled, wasting valuable materials that could make electric vehicles more sustainable and affordable. There is strong potential for the ...

[Learn More](#)

[Why we need critical minerals for the energy transition](#)

Critical minerals like lithium, cobalt and rare earth elements are fundamental to technologies such as electric vehicles, wind turbines and solar panels, making them ...

[Learn More](#)

[Africa's green opportunity to be an industrial powerhouse](#)

Africa has an enviable wealth of minerals such as copper, lithium and cobalt that are vital for the world's clean energy transition. The continent's population is predicted to reach ...

[Learn More](#)

[This chart shows which countries produce the most lithium](#)

Lithium is a lightweight metal used in the cathodes of lithium-ion batteries, which power electric vehicles. The need for lithium has increased significantly due to the growing ...

[Learn More](#)

[How to future-proof our energy through battery production](#)

Why we must leverage technical innovation, public-private partnerships, existing infrastructure and skilled labour to optimize battery production globally.

[Learn More](#)

[Lithium and Latin America are key to the energy transition](#)

Around 60% of identified lithium is found in Latin America, with Bolivia, Argentina and Chile making up the 'lithium triangle'. Demand for lithium is predicted to grow 40-fold in the ...

[Learn More](#)

[Electric vehicle demand - has the world got enough lithium?](#)

Lithium is one of the key components in electric vehicle (EV) batteries, but global supplies are under strain because of rising EV demand. The world could face lithium ...

[Learn More](#)

[Lithium: The 'white gold' of the energy transition](#)

Also known as the 'white gold' of the energy transition, Lithium is one of the main ingredients in battery storage technology, powering zero-emission vehicles and storing wind ...
