Lithium iron phosphate energy storage solar container lithium battery in Tampere Finland

Lithium iron phosphate energy storage solar container lithium battery

[How innovation will jumpstart lithium battery recycling](#)

Too many lithium-ion batteries are not recycled, wasting valuable materials that could make electric vehicles more sustainable and affordable. There is strong potential for the ...

[Electric vehicle demand - has the world got enough lithium?](#)

Lithium is one of the key components in electric vehicle (EV) batteries, but global supplies are under strain because of rising EV demand. The world could face lithium ...

[Learn More](#)

The future is powered by lithium-ion batteries. But are we ...

The shift to electric vehicles and renewable energy means the demand for lithium ion batteries and the metals they are made from is set to increase rapidly. But at what cost?

[Learn More](#)

[This chart shows which countries produce the most lithium](#)

Lithium is a lightweight metal used in the cathodes of lithium-ion batteries, which power electric vehicles. The need for lithium has increased significantly due to the growing ...

[Lithium: The 'white gold' of the energy transition](#)

Also known as the 'white gold' of the energy transition, Lithium is one of the main ingredients in battery storage technology, powering zero-emission vehicles and storing wind ...

[Learn More](#)

[Why we need critical minerals for the energy transition](#)

Critical minerals like lithium, cobalt and rare earth elements are fundamental to technologies such as electric vehicles, wind turbines and solar panels, making them ...

How to future-proof our energy through battery production

Why we must leverage technical innovation, public-private partnerships, existing infrastructure and skilled labour to optimize battery production globally.

[Learn More](#)

Lithium and Latin America are key to the energy transition

Around 60% of identified lithium is found in Latin America, with Bolivia, Argentina and Chile making up the 'lithium triangle'. Demand for lithium is predicted to grow 40-fold in the ...
