

# Madagascar Energy Site Locations

## Overview

---

How is energy used in Madagascar?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is biomass a source of electricity in Madagascar?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Madagascar: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Is nuclear power a good source of electricity in Madagascar?

This can be an important source in lower-income settings. Madagascar: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity. For a number of countries, it makes up a large share of electricity production.

How many people in Madagascar have access to electricity?

Access to electricity is low, with around 36% of the total population having access to electricity (23% grid access). In rural areas, only 7% of the population has access to electricity. The Government of Madagascar has set a target of 70% access to electricity by 2030.
