

# Main customers of new energy storage

## Overview

---

Who owns the energy storage system?

The grid subsidiary is the owner of the energy storage system. The third type is the third-party investment. Under this investment model, the energy storage system is invested and operated by third parties.

What are the emerging energy storage business models?

The independent energy storage model under the spot power market and the shared energy storage model are emerging energy storage business models. They emphasized the independent status of energy storage. The energy storage has truly been upgraded from an auxiliary industry to the main industry.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

How to develop energy storage business model in China?

In order to guide the development of energy storage business model, it is recommended to improve policy formulation in terms of planning, technical standards, market and regulatory mechanisms. In the planning stage of the power system, the Chinese government should consider the safety, economic and social benefits of energy storage.
