

# Malta's 5G base stations are decreasing

## Overview

---

Is Malta ready for 5G?

Malta issued a National Roadmap for the UHF band between 470 –790 MHz in 2018, as well as a discussion paper and survey 5G Demand and Future Business Models. Towards a Feasible 5G Deployment in 2019, with references to Gigabit Society 5G targets. Malta's Recovery and Resilience Plan foresees EUR 67.6 million (26%) to the digital transformation.

What is Malta's 5G strategy?

The strategy aims to facilitate the modernisation of the Public Administration through technology direction and digital solutions. Malta issued a National Roadmap for the UHF band between 470 –790 MHz in 2018, as well as a discussion paper and survey 5G Demand and Future Business Models.

How many base stations will 5G have in 2025?

The U.S. has ambitious plans for 5G expansion, aiming to have more than 300,000 active base stations by 2025. This goal is being driven by investment from private telecom providers and government initiatives like the Rural 5G Fund. For businesses in the U.S., this means increasing access to high-speed connectivity.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.
