

# Manchester Power Air solar container energy storage system UK

## Overview

---

Why is renewable power important for Greater Manchester?

Speaking at today's ceremony, Mayor of Greater Manchester, Andy Burnham, said: "Storing renewable power so it's there when people need it will be essential for Greater Manchester in the years ahead. This project is an important step in that direction, and it's already supporting jobs and skills in the area through its construction and supply chain."

Where will a liquid air energy storage plant be built?

Construction to begin imminently at commercial-scale liquid air energy storage (LAES) plant in the United Kingdom. Major investors include Centrica, which joins as a strategic partner. From pv magazine ESS News.

How long can a solar energy storage system last?

Unlike other storage technologies, LAES can operate without degradation for between 40 and 50 years and is fully locatable and modular. It is ideal for firming intermittent renewables, reducing curtailment and supporting the transition from fossil fuels to wind and solar.
