

IMK CONTAINERS

Manufacturers of folding containers for port use networked type

Overview

Who makes foldable containers?

HCI is not the only company that produces foldable containers. Another example is Staxxon, an American manufacturer of accordion-like foldable containers. They are ISO approved and will be commercially available in 2023. They can be folded and unfolded by two people or with Material Handling Equipment (MHE).

Why are foldable containers so popular?

Only about 33% of container ships globally arrive on time at ports. The delays make container management difficult, so congested terminals are common. Limited space in ports stimulates innovation. Thus, foldable containers were born. Cargo containers have been in common use since the second half of the 20th century.

What is a foldable container?

It is, therefore, suitable for use by shipping lines and terminals. Foldable containers save up to 75% space and costs (50-60%). One standard container takes up as much space as four foldable ones. In addition, they are more environmentally friendly. The transport of foldable containers generates 37% less carbon dioxide.

What is a seafold container?

In maritime operations, SeaFold containers deliver substantial cost savings for one-way cargo shipments through more efficient loading and unloading procedures. Their design allows for additional stowage space on mainline and feeder vessels, which in turn reduces the vessel's time in port.
