

Marshall Islands new energy station put into operation

Overview

What is the future of the Marshall Islands electricity system?

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it depends on our people. Take a look at where we are headed.

What is the Marshall Islands electricity roadmap?

The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way. The Marshall Islands Electricity Roadmap presents costed, technically sound pathways to help achieve our NDC.

Where are Marshalls Energy's Solar panels located?

The Marshalls Energy Co.'s solar panels are on school and government building rooftops. Photo courtesy of Marshall Islands Energy Co. In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power.

How can the Marshall Islands improve quality of life?

"An improved quality of life for the people of the Marshall Islands through clean, reliable, affordable, accessible, environmentally appropriate and sustainable energy services." "The Republic of the Marshall Islands (RMI) submitted its second NDC in 2018 at COP 24 in Katowice, making it the first country in the world to do so.
