

IMK CONTAINERS

Moronni Solar Folding Container 350kW

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

How many solar panels can be installed in a solarcontainer?

The unfolded panels can reach up to 120 meters in length, and there are 240 solar panels that can be installed. The Solarcontainer is a mobile system that can be used for both on- and off-grid purposes, including rescue missions and gatherings. The foldable photovoltaic panels are tucked inside a mobile solar container.

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

How do foldable solar panels work?

The foldable photovoltaic panels are tucked inside a mobile solar container. The mobile solar container can take up to five hours to assemble and make it operational. Its base is made up of a solid floor frame, and mounted on this frame is the photovoltaic panels' rail system and the folding mechanism.
