Nauru Energy Storage Project

2025

Overview

How can Nauru reduce its reliance on imported diesel?

In parallel, Nauru is rolling out a \$22 million renewable energy project aimed at reducing its reliance on imported diesel. The project includes a 6-megawatt solar farm which, now nearing completion, is expected to lift renewable energy's share of electricity generation from 3 per cent to 47 per cent.

How much money will be spent on environmental projects in Nauru?

This is currently estimated at \$17.30 million and will cover \$7.70 million of the expenditure related to civil works, \$6.60 million for additional physical contingencies, and \$3.00 million of in-kind contributions. Funded by the Asian Development Bank, Green Climate Fund, Australian Government (DFAT) and Government of Nauru.

Is Nauru ready for economic revival in 2025?

Nauru is making steady progress toward economic revitalisation in 2025, with the Asian Development Bank (ADB) projecting a 2.5 per cent GDP growth for both 2025 and 2026, as outlined in the April 2025 edition of the Asian Development Outlook.

What is Nauru doing now?

After years of economic stagnation, the country is now seeing positive momentum, fuelled by large-scale infrastructure investments, renewable energy projects, and a modest resurgence in tourism. A centrepiece of Nauru's infrastructure agenda is the construction of its first international seaport in Aiwo District.
