

North American rooftop PV inverters

Overview

How big is the North America solar PV inverters market?

The North America solar PV inverters market is set to experience substantial growth, forecasted to expand from a valuation of US\$ 1,357.63 million in 2023 to an impressive US\$ 3,094.06 million by 2030.

How will the North America solar PV inverters market evolve?

The North America solar PV inverters market is poised for significant growth, driven by governmental support and a growing focus on renewable energy sources. As the market continues to evolve, these factors will play a critical role in shaping its future trajectory, offering substantial opportunities for market players and investors alike.

Who is leading the North American Solar PV inverter market in 2023?

By Country: Focusing on the US, Canada, and Mexico, with the US leading the market in 2023. Several key players are leading the North American solar PV inverters market, including Power Electronics SL, SMA Solar Technology AG, Solaredge Technologies Inc, Fimer SpA, Delta Electronics Inc., EnerTech UPS Pvt Ltd, and GoodWe Technologies Co. Ltd.

What is rooftop inverter capacity claim?

*#1 in Rooftop inverter capacity claim is based on aggregated residential and non-residential SolarEdge inverters estimated capacity published on Wood Mackenzie US DG solar national competitive landscape leaderboard as of January 2025. The data provided by Wood Mackenzie should not be relied on for any purpose, copied, or used.
