North Asia PV module export volume share

Overview

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93GW of PV modules, an increase of 13% compared to 207.99GW in the same period in 2023. Comparison of Chinese PV module exports in 2023 and 2024. Source InfoLink.

Which country imports the most PV modules in Asia-Pacific?

The cumulative shipment to the Asia-Pacific market was about 68.11GW, an increase of 26% compared to 53.93 GW in the same period of 2023. Among the countries in this region, Pakistan had the highest share of module shipments, importing around 16.91GW of PV modules, up 127% from 7.47GW in the same period in 2023.

Which countries import PV modules from China?

In December, China exported approximately 16.63GW of PV modules, a 9% increase compared with the 15.2GW in November. The ranking of countries importing PV modules from China was Brazil, the Netherlands, India, Saudi Arabia and Spain. The total monthly imports of these major countries accounted for about 42% of the global market.

How many GW of modules did China Export in November 2024?

China exported 15.2 GW of modules in November 2024, down 12% MoM from 17.34 GW and down 14% YoY from 17.71 GW, according to InfoLink's customs data. China exported 219.31 GW of modules from January to November 2024, up 14% YoY from 191.81 GW.
