

Oman solar container communication station Supercapacitor Tower

Overview

What is Oman's largest solar power project?

Commercial operations of Oman's largest utility-scale solar photovoltaic, independent power project, Ibri 2, started in January 2022. Oman Power and Water Procurement Company (OPWP) awarded the project to a consortium of Saudi and Kuwaiti firms, for which Beijing-based Asian Infrastructure Investment Bank (AIIB) loaned \$60 million.

Will Oman slash its emissions to 50 percent by 2030?

State-owned PDO which aims to slash its emissions to 50 percent of 2019 levels by 2030, is an early pioneer in large-scale solar power projects in Oman. Oman's integrated oil and gas company OQ is also seeking international partners to replace 40 percent of its three-gigawatt power consumption with renewable energy projects.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.

Will Oman achieve net zero emissions by 2050?

Oman has committed to net zero emissions by 2050. The government is looking to expand its electricity-generation capacities through renewable independent power projects (IPP), with plans to derive at least 30 percent of electricity from renewables by 2030, mainly through onshore wind and solar projects.
