

# **Ottawa home solar container energy storage system quotation**

## Overview

---

Why should you choose a solar company in Ottawa?

Most solar companies are about the sales. We're about lasting systems — and bringing the future of Ottawa solar power to your home and business. From Cumberland to Carleton Place, we're not a call center with a crew. Our local roots run as deep as our experience — and we couldn't be prouder to have installed our neighbours' solar panels since 2009.

Are solar and battery storage a distributed energy resource?

Solar and battery storage are considered a Distributed Energy Resource, or DER. This refers to small-scale power generation and storage systems that are 'distributed', meaning they are spread out closer to where the energy is needed, rather than relying on one large power source.

Can Ontario homeowners save money on battery storage?

The Ontario government is launching new energy efficiency programs to help homeowners save money. The \$10.9 billion budget is the biggest in Canadian history. Through the Home Renovation Savings Program, homeowners can save 30% — or up to \$5,000 — on the cost of home battery storage. Here is a breakdown of the different rebates available:.

How much does a home energy storage system cost?

Prices for home energy storage systems can range from \$12,000 to \$20,000. The battery alone will cost a minimum of \$8,000, but once you factor in labor, permitting, and the balance of components, the total cost may increase by an additional \$4,000 to \$12,000.
