# Outdoor Power and Generators

## Overview

---

How to install an outdoor generator?

Buy an appropriate weatherproof outdoor generator plug and install the plug on the exterior of your home. In addition to the normal electrical tools (screwdrivers, pliers, wrenches, electrical tape, drill, etc.), make sure you have a good set of work gloves and protective eyewear. Working with wiring and electricity is no joke! 4.

What is an outdoor generator enclosure?

In commercial settings, outdoor generator enclosures are typically made of heavy-duty materials and designed specifically for the generator's needs, with appropriate ventilation and access points. They support optimal operation, such as cool temperatures and maintenance demands, while offering protection from the weather, theft and vandalism.

Can a generator be used inside?

Never use a generator inside a house or a closed garage. Place the generator outside in an open area away from windows, door and vents. Generators produce carbon monoxide. If used in an enclosed area, they can cause carbon monoxide poisoning. Keep the generator dry by setting it on dry ground or a suitable surface, such as a concrete pad.
