Outdoor wireless AP base station settings

Overview

What is the TP-Link outdoor wireless base station?

The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users. Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas.

What is Outdoor Mode on unifi access points?

Outdoor Mode on UniFi access points is designed for exactly what it sounds like, outdoor use. It adjusts power, disables DFS channels, and optimizes signal behavior for open-air environments. When used correctly, it boosts long-distance performance and ensures compliance with wireless regulations.

What is an indoor AP?

Indoor APs are, usually, equipped with omnidirectional antennas (which allow broadcasting the signal in a "donut" shape around the AP), which have a relatively low antenna gain. For indoor and short distance outdoor installations, it is a perfect antenna to use.

Can the wbs510 be paired with a TP-Link dish antenna?

Where long- distance wireless data transmission is necessary, the WBS510 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 50 km *. Pharos Base Stations works seamlessly with TP-LINK dish and sector antennas to provide efficient PtP and PtMP data transmission.
