

Philippines energy storage equipment box manufacturer

Overview

What is Masinloc battery energy storage?

The Masinloc Battery Energy Storage System (BESS) is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. We started our venture into battery energy storage technology in 2018 when we acquired this 10 MW system from AES Philippines.

What is energy storage battery?

The startup's flagship product known as the Energy Storage Battery is designed to provide affordable and sustainable power supply to those living in off-grid locations. It is equipped with a solar panel, battery and inverter unit that can provide power for up to three hours per day.

Does the Philippines have a solar battery market?

The government's push to increase solar PV installations includes growing support for residential and commercial solar battery storage systems. Solar battery prices in the Philippines depend on brand, capacity, technology (LiFePO₄ vs. lead-acid), and features like Wi-Fi monitoring, wall-mounting, and cycle life.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.
