# Photovoltaic Folding Container Fixed Type for Wastewater Treatment Plants

## Overview

---

What is a solarfold photovoltaic container?

at full power. The solarfold Photovoltaic Container is mobile for universal deployment with a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into its operating position rapidly and smoothly along a length of around 123 metres.

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

Can photovoltaic conversion of solar energy be used in wastewater treatment?

The application of photovoltaic conversion of solar energy in wastewater treatment is described and the research progress of photovoltaic conversion in electrooxidation system, reverse osmosis process, electrocoagulation process, aeration equipment, electroflocculation technology and fenton technology is reviewed.
