

Prague wind power storage requirements

Overview

Is there a future for energy storage in the Czech Republic?

Despite the ongoing discussions, there is no significant development in the area of energy storage. In 2015, the Czech Government adopted the National Action Plan for Smart Grids (“NAPSG”) prepared by the Ministry of Industry and Trade under principles set out in the update of the State Energy Concept, which was also introduced in 2015.

Is the Czech Republic ready for pumped-storage hydroelectric power plants?

Bulk energy storage is currently dominated by hydroelectric dams, both conventional as well as pumped. There are six localities considered for new pumped-storage hydroelectric power plants in the Czech Republic but public acceptance presents a challenge. Front-of-meter installations in the Czech Republic are mired in regulations.

Are there any large-scale electricity storage projects in the Czech Republic?

There are no other larger-scale electricity storage projects currently being developed in the Czech Republic. However, the Czech government provides subsidies to household projects consisting of photovoltaic panels with electricity storage systems.

How can the Czech Republic improve the energy system?

Hydrogen production in the Czech Republic can help with the regulation of the electricity system by making efficient use of the surplus of energy generated. 8) Finally, “last mile” will be needed, especially for heavily decarbonised sectors, the use of carbon storage technology and use. By 2050, the scenario envisages a total volume of 18 Mt.
