Price of a complete set of solar panels
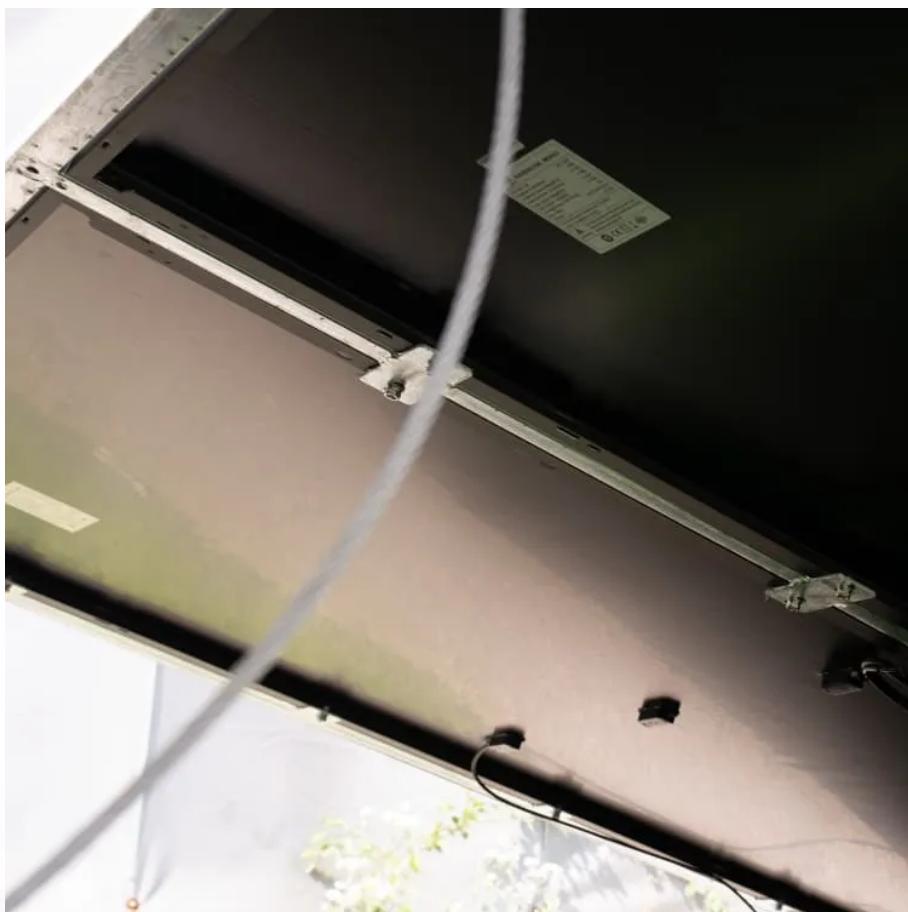

Overview

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around $200 to $350 per panel (between $0.80 and $1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from $7,000 to $18,000 to your total solar system costs.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is $17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. Net cost of the system / lifetime output = cost per kilowatt hour.

How much does a solar system repair cost?

Professional cleaning services cost around $150-$350 annually, depending on system size and location. Repairs, although less frequent, may involve replacing inverters, which can cost $1,000-$2,500, or repairing damaged panels, ranging from $200-$600 per panel. Regular checkups can identify issues early, reducing long-term costs.
