

S-800-12 inverter

Overview

What is an 800/12 inverter?

An 800/12 inverter is a DC-to-AC power converter designed to transform 12V DC input into 120V AC output with a continuous 800W capacity (1,600W surge). It's optimized for off-grid solar systems, RVs, and marine applications, providing pure sine wave output for sensitive electronics.

What is Sungrow solar inverter?

Guess you want to find it. S450S/S800S/S1000S/S1600S Sungrow offers solar inverters with a high efficiency of over 99%, ranging from 450W to 8.8 MW. Besides, Sungrow PV inverters can be converted on any desired scale.

What is the difference between a 12V and a 24V inverter?

The 800/12 inverter balances portability and power, unlike bulky 24V/3kW units. It's ideal for 12V systems, whereas 24V inverters require double the battery cells. Pure sine wave models outperform modified sine wave (e.g., cleaner motor operation). Pro Tip: 24V inverters are better for 2,000W+ loads—like choosing a V6 engine over a 4-cylinder.
