

Safety requirements for outdoor power products

Overview

What are the safety requirements for electrical products?

The Electricity Act 1992 requires all electrical products to be of a high quality and standard, so that their construction and maintenance meet the safety requirements within the Electricity (Safety) Regulations 2010. The regulations identify certain features within products that are unsafe.

Why is outdoor power equipment important?

For consumers and construction companies of all sizes, the outdoor power equipment they choose plays a crucial role in their project success. They have to rely on equipment that is dependable, high-quality, and safe – and they look for a proven approval mark they trust.
