

San Diego polycrystalline solar panel prices

Overview

What is the cost of solar panels in San Diego?

As of August 2024, the average solar panel system costs \$2.36/W including installation in San Diego, CA. For a 5 kW installation, this comes out to about \$11,800 before incentives, though prices range from \$10,030 to \$13,570. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much do polycrystalline solar panels cost?

The national average cost range for polycrystalline solar panels is \$4,000 to \$6,600, with most people paying around \$5,000 for 10 installed polycrystalline solar panels with 300 watts each. This project's low cost is \$3,000 for 10 panels with 250 watts each installed. The high cost is \$8,800 for 10 installed panels with 400 watts each.

How much does a 5 kW solar system cost in San Diego?

In San Diego, CA, a 5 kW solar system costs \$11,800.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.
