

Selling solar container outdoor power in Hanoi

Overview

Why should foreign investors invest in solar energy in Vietnam?

Vietnam's solar energy market, driven by high solar potential and strong government support, plays a key role in the country's "Net Zero" commitment, among other fields of green energy. For foreign investors, this presents a golden opportunity to tap into a rapidly growing sector with sustainable impacts.

Does Vietnam have a rooftop solar market?

The rooftop solar market in Vietnam has witnessed remarkable growth, with the total capacity for solar power reaching approximately 16,567 MW by the end of 2022. Notably, rooftop solar alone contributes over 9,000MW to this figure, underscoring the significant role of rooftop installations in the nation's renewable energy portfolio.

Does Vietnam need solar power?

Vietnam is rapidly increasing its reliance on solar power, with plans to generate 16% of its energy from solar by 2030. This shift is driven by significant investments in solar farms across the country. Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy.

Does Vietnam have a solar energy strategy?

Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy. By 2030, the country aims to generate 16% of its energy from solar, driven by substantial investments in solar farms across the nation.
