# Singapore Energy Storage New Energy Company

## Overview

---

Does Singapore need energy storage systems to manage solar intermittency?

However, the minister said there is a need to “step up energy storage systems to manage solar intermittency.” Talks are currently ongoing with Sembcorp, the engineering conglomerate behind the 200MW/285MWh battery energy storage system (BESS) installation on Singapore’s Jurong Island.

Could Singapore sit at the 'core' of new energy grids in Southeast Asia?

Singapore could sit at the “core” of new regional electricity grids in Southeast Asia, with proposed interconnections to neighbouring countries set to bring 25GW of new renewable power and energy storage projects online. This is according to Rystad Energy, which published a report into Singapore’s role in the Southeast Asian energy mix this week.

What is accelerating energy storage for Singapore (ESS)?

For instance, the Accelerating Energy Storage for Singapore ("ACCESS") programme promotes use cases and business models with industry partners and other government agencies. The programme also helps to secure space, match demands and solutions, and facilitate regulatory approvals for ESS deployment.

Will EMA & Sembcorp expand solar energy storage in Singapore?

With that one project, Singapore its 200MWh by 2025 energy storage target and minister Gan Kim Yong said it helps to “counteract sharp and unexpected drops in solar energy.” “EMA and Sembcorp are in discussions to expand the system and increase the land use density in tandem,” Yong said.
