

# Slovenia household energy storage power supply manufacturer

## Overview

---

What are the main sources of electricity in Slovenia?

A paid subscription is required for full access. Nuclear power is the most used source of electricity production in Slovenia. In 2022, nuclear power plants accounted for 42 percent of total electricity generation. Coal-fired and hydropower plants followed, each making up approximately 24 percent of power production that year.

Who is the largest producer of electricity in Slovenia?

With a 65% share of produced electricity, the HSE Group is the largest producer in Slovenia. Our power plants annually produce around 7 terawatt hours of electricity. We are one of the main daily traders in Southeast Europe. The HSE Group trades in electricity in 20 European countries, 24 hours a day and every day of the week.

What types of energy storage systems does Jinko power offer?

Depending on application scenario, Jinko Power provides all types of customers with tailored energy storage system solutions, including power energy storage system integration solutions, industrial and commercial energy storage system integration solutions, and household energy storage systems.
