

# Solar 72v electric water pump

## Overview

---

How many gallons can a 72 volt solar water pump flow?

72 volt solar water pump with special DC controller has maximum head 56~95m (180~310ft), maximum flow 925~1585 gallons per hour, single-suction plastic/stainless steel impeller, 3 inch/4 inch inlet diameter and 1.25 inch outlet diameter. 1 hp solar deep well pump can be used for tank, pool, fountain or water feature. Max. Flow & Max. Head \*.

What is a solar powered water pump?

**Solar-powered Water Pumps:** These pumps use energy from the sun to power electric pumps, which extract water from the ground. The price and technology have evolved in recent years, allowing solar-powered water pumps to be a more affordable, reliable and environmentally sustainable solution to water scarcity.

What is solar PV water pumping system?

**Introduction** The solar PV water pumping system is best solution for remote areas where grid connectivity is not possible. The design of the system using simulation software helps to get the best result from available resources. Software results help to rectify problems of the system before on field installation.

How to choose a solar water pump?

According to the power of the solar water pump for deep well and the strength of the sun, choose the right solar panel. Usually, we choose the power of the panel, which is 1.5 times the pump power. If want higher output voltage, increase the solar panels as appropriate.
