

# Solar Panel Teaching Aids

## Overview

---

What is a solar energy trainer?

The trainer demonstrates the possibilities and energy advantages offered by a direct utilization of solar energy. Consists of modules which can be assembled on the panel frame easily, enable the student to study in modular way.

What is a solar energy demonstrator trainer?

The Solar Energy Demonstrator Trainer is a teaching aid that can be used to teach the fundamental concept of solar energy electrical generation. The trainer demonstrates the possibilities and energy advantages offered by a direct utilization of solar energy.

Why should I donate to solar-education?

Support us, to bring climate education to all schools - for a generation that is ready to change the world! With your donation you help us to further develop our learning materials and expand our organization. [solar-education.org](http://solar-education.org) is a non-profit organization. Your donation is 100% tax deductible.

What type of school should a photovoltaic system be used for?

For any type of school, any subject and any grade from preschool onwards.  
Playful understanding of the functioning of photovoltaics  
Five electricity experiments for independent exploration  
Four scientific photovoltaic experiments  
A full-size PV system as teaching aid in the classroom  
Curriculum-oriented school lessons from STEM to ethics
